

Assignment 1: Product Vision, User Stories, and Roadmap

This is a group project, work with your team members. 80% attendance in online meetings is mandatory to pass this assignment.

1.1 Think about a novel software product and develop the “Product Vision” using the Moor’s vision template and the following three guiding questions.

- What product is to be developed?
- Who are the target customers and users?
- Why should customers buy this product?

1.2 Describe your product to more than five users and collect user stories.

1.3 Develop a roadmap for software product development. Identify the product features, the essential features for the first release, and the timelines. This involves understanding skills of team members, role identification, task allocation, meeting scheduling, software development, testing, demonstration, and customer feedback. The process must be planned and implemented within the semester.

Instructions: Submit to Moodle your report before midnight on 29/03/2026 (Sunday)
