

Sprint Backlog and Plan

Software Engineering - SVNC.00.308

Project: StayEase Hotel Reservation System
Team: Cat Bacillus (Kyrylo Pryiomyshev, Danylo Chernov, Daniil Ustuhov)
Date: March 9, 2026
Version: 1.0

Project Name: StayEase Hotel Reservation System

Team: Cat Bacillus (Kyrylo Pryiomyshev, Danylo Chernov, Daniil Ustiuhev)

Sprint Number: 2

Sprint Duration: 90 minutes (Lecture 7 + Lecture 8)

Date: March 9, 2026

Sprint Goal

Goal: Complete double-booking prevention, enable reservation cancellation and history viewing, and deliver the front desk staff dashboard.

Capacity Planning

Sprint 1 Actual Velocity: Committed 21 points, completed 18 points

Sprint 2 Adjusted Capacity: 16 story points

Rationale: Based on Sprint 1 actual velocity of 18 points, we are committing to 16 points to account for the carried-over complexity of US-05 (transaction locking) and to leave room for the process improvements from our retrospective (distributed testing will add some overhead initially). If we complete early, we will pull US-10 (Check-In/Check-Out) from the backlog.

Team Availability: All 3 members available for full sprint.

Retrospective Action Items Applied

- Reduced commitment from 21 to 16 points (velocity-based planning)
- Testing distributed across all team members (each developer tests own feature)
- US-05 re-estimated from S(3) to M(5) after identifying concurrency complexity

Selected User Stories

Story ID	User Story Summary	Priority	Estimate	Status
US-05	Prevent double booking (carried from Sprint 1)	Must-have	M (5)	To Do
US-06	Cancel reservation (24h policy)	Must-have	M (5)	To Do
US-07	View reservation history	Must-have	S (3)	To Do
US-09	Front desk staff dashboard	Must-have	S (3)	To Do

Total Committed: 4 stories, 16 story points

Note: US-09 was re-estimated from M(5) to S(3) after Sprint 1 — we now have the reservation data layer built, so the dashboard is primarily a UI task reading existing data.

Task Breakdown

Story	Task Description	Owner	Est.	Status
-------	------------------	-------	------	--------

y			Time	
US-05	Implement SELECT FOR UPDATE transaction locking	Kyrylo	15 min	Done
US-05	Add alternative room suggestions when unavailable	Danylo	10 min	Done
US-05	Test concurrent booking scenarios	Kyrylo	10 min	Done
US-06	Implement cancellation API with 24h policy	Kyrylo	15 min	Done
US-06	Build cancel button with disabled state for <24h	Danylo	10 min	Done
US-06	Test cancellation (valid, within 24h, already cancelled)	Daniil	10 min	Done
US-07	Implement reservation history API (past + upcoming)	Kyrylo	10 min	Done
US-07	Build My Reservations page with status badges	Danylo	15 min	Done
US-07	Test history display with mixed statuses	Daniil	10 min	Done
US-09	Implement dashboard API (today's check-ins/outs, occupancy)	Kyrylo	10 min	Done
US-09	Build staff dashboard UI with search and summary cards	Danylo	15 min	Done
US-09	Test dashboard with various reservation scenarios	Daniil	10 min	Done

Sprint Progress Tracking

Day 1 (Lecture 7)

Completed

- US-05: Transaction locking implemented and concurrent booking tests passed
- US-06: Cancellation API and UI fully implemented

In Progress

- US-06: Edge case testing (cancellation within 24h window)
- US-07: Reservation history API started

Blockers

- None — distributed testing approach is working well

Day 2 (Lecture 8)

Completed

- US-06: All tests passed including edge cases
- US-07: Reservation history fully implemented and tested
- US-09: Staff dashboard fully implemented and tested

In Progress

- None — all stories completed

Blockers

- None

Sprint Notes

Decisions

- Used PostgreSQL SELECT FOR UPDATE to lock room rows during booking transactions
- Cancel policy checks server-side (not just UI) to prevent API-level bypass

Technical Notes

- Transaction isolation solved the concurrency issue cleanly — two simultaneous booking attempts now correctly reject the second one
- Dashboard occupancy calculation uses a simple COUNT query grouped by room status

Sprint Commitment

Kyrylo Pryiomyshev: _____ Date: March 9, 2026

Danylo Chernov: _____ Date: March 9, 2026

Daniil Ustuhov: _____ Date: March 9, 2026
